- A BI-WEEKLY RELEASE -

OF

THE B. S. R. A.

3524 ADAMS AVENUE

SAN DIEGO 16, CALIF.

CLIPS, QUOTES, COMMENTS

A - 9 - October 31, 1953

MISCELLANEA:

THE VOICE OF THE YADA: WHAT DO THE DISCS PORTEND? (1-2)

YIPE FROM HEADQUARTERS - (SOS to Associates) -- (3)

THE PYRAMID EFFECT - Note from Santa Cruz - & an Auramirror (4)

ANNOUNCEMENTS: (An important Transcript - & recent publications (5)

MEMO. TO ACCOMPANY THE PUBLIC INFORMATION BROCHURE (as sent to various Defense Authorities, and quoted 'for your information') - - - - - - (6)

ATTENTION OF ASSOCIATES (Increasing need for cooperation).- 7

(C.Q.C. is distributed on the 1st and 15th of each month, by the Borderland Sciences Research Hdqrs., 3524 Adams Ave., San Diego 16, Calif. -- 12 issues (6 mo.): $5.00 -- 6 issues, 3 mo., $2.50. Two issues $1.00. Sample copy sent anywhere on request. CQC contains only short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN).

Informational: The "Q ENERGY" brochure, with sample of film, should be ordered from BSR Hdqrs ($1.00); the film itself is obtainable from Originality House, Inc., 480 Avalon Ave.,Akron 20, Ohio. Price list from either source. - SAUCERS magazine, Max B.Miller, Ed., address box 34, Los Angeles 35, Calif. Copy .25. Vol. I No.2 contains the Bethurun article ("Inside a Flying Saucer"). - DOUBT Magazine is the publication of the Fortean Society; Box 192 Grand Central Annex, N.Y.C. Copy .35 - TALK OF THE TIMES, F.E. Rogers, Ed., Box 1467, San Diego 12, Calif. Copy .30 -- THE SAUCERIAN is a 36-pg. mimeo magazine, Box 981, Clarksburg, W. Va. Perhaps the most elaborate of the "Saucer" periodicals. Copy .35. Recommended.-- MID-PACIFIC MAGAZINE has been revived by BSR Assoc. Riley Crabb & Charles Kong, Bx 1513, Honolulu. Copy .25 -- Best books on "Saucer" business: FLYING SAUCERS HAVE LANDED, by Desmond Leslie (BSR Assoc.) and George Adamski (British Book Center, 420 W. 45th St. NYC 36. $3.50) - and (by all report) Maj. Kehoe's forthcoming book. NOTE: Do not order any of these publications from BSR -- unless so specified, as with the Q-ENERGY brochure.

It is about two and a quarter billion years since man made his first attempt to live on the earth - and about seven billion years since the formation of the primaeval vortex from which the earth arose. Throughe t out all this enormous period of time (by your measurements) the people of the Discs, in their craft which we call KAREETAS, have been making periodic visits to the earth and studying its nature and action.

All races of men have seen them. Five hundred thousand years ago they were well known to the dwellers in YU, the civilization of the Himalayas.

What does their present coming portend? The universe, the whole Cosmos is expanding. It is like an explosion of the Cosmos. You know that there are dwarf stars, and also that there are Super-Novas. Now, these pass one into the other; each can become the other. This is also true of the Island Universes, which can and do change back and forth. This is the play of atomic energy, of magnetism, of attraction and repulsion. All the stars, the Suns are in effect huge dynamos ...

These Discs you are asking about - they do NOT belong to the world of three-dimensional matter. They come out of other and far greater densi - ties. They come out of worlds of substance a hundred thousand times more dense than the matter which you perceive by your senses.

You have asked me:this question: Since the 'crossing of space', of distances measured in terms of light years is impracticable even at the speed of light, yet the Kareetas are said to come (some of them) even from beyond the galaxies - what expression can we use to indicate this 'crossing'?

I reply, that the only word I can suggest is EMERGENT. It is used by you in philosophy, I think in your science also. Consider this set of ivory balls, one within another, within another - ten in all. They are free to move one within another, one outside another. Let us say there is no space at all between them - between the outside of one ball and the in-side of the next. On each ball there are corresponding points. Any point, that is, any <u>place</u> - space-time place - on, say, the outside ball (shall we call it your earth world) has a point on its in-side, or, a point corresponding to it on the out-side of the second ball - so on through all the concentric or nested balls. Now, that which IS on the the surface of any one ball may EMERGE on any of the others, without being hindered by any 'crossing of space'. If there is no crossing of space, then the factor of <u>time</u> has no meaning. This illustration, inadequate of course, may yet be helpful.

The 'materialization' of entities in your world is of the nature of an <u>emergence</u>.

You asked, 'what does the visitation of the Discs portend? Even though we cannot understand it fully, what does it portend?' I would say that it portends in greatest part the expansion of your Sun into a Super-Nova. The under-strata of the earth are getting hotter. This is caused by an increasing cosmic radiation. More and more of this is passing throught the ionosphere. It effects a mutation in the chemistry of the earth and a kind of crystallization of the surface. Huge hollows are

formed and the brittle outer crust collapses into them. This means that your planet will be subject to violent earthquakes. These physical effects and chemical alterations are being studied by the Space People, and for this reason they are often seen gathering sample s of soil and water.

(A question to the Control: Is the future of our planet really known on your plane of existence?).

Control: Yes.

(Question: An eminent occultist has recently said, that "an incredible interplanetary debacle" is in the making. Have you any comment?

Control: Yes - I go along with that.

(Question: Would you say that this event is still remote?

Control: Some things we are not allowed to say - and you know that is one of them. Please excuse me from answering.

Y.di S.
10-15-53

"The reason for the atom being so difficult to smash is on account of its interior gravitational pull. Truthfully, the atom has never been smashed - only a piece of it has been blown away, or thrown away - which is the outer shell or one of the outer shells. Should you ever truly break up the atom you would not only turn it off into another, but you would turn your whole solar system into a super-solar. The whole system would become nothing but light radiation, millions of times brighter than your sun -- ...

"All this earth talk about the Discs! The mere fact of these objects is nothing new or remarkable; man has been flying for many centuries in one way or another. But earth people cannot be given the secret of building these Discs right away because if it fell into the hands of any one government it would make war inevitable - though it is so anyway...

" Yes, the Canadian scientists know a way of operating the Discs but not as done by the space people - there is almost no comparison. The substances of the space disc are not the same as the groupings you have on your earth. The molecular structure is entirely different. The electronic fields are different from those of substances you have. The linking together of molecules (in the Disc material) is of such tensile strength that no force known to you can break them apart, or cause a cut or break in the substance .....

" The particles that make up the ethers can be thought of as sub-sub-atomic matter -- and as we 'sub' lower than that we go out of existence so far as the world of measureable matter is concerned. The ether is 'there' whether for a purpose or not - there is no such thing as Nothingness ... it is a word, a sound, not even an idea .....

Y.di S.9-26-53

YIPE FROM HEADQUARTERS:

For one thing, if you are subscribing to both RR (as a BSR Assoc.), and to Clips & Quotes, please be tolerant of occasional repetitions of items. We want to be sure that some of these reach everybody on our mailing list.

And if some of the announcements (as in this current CQC-9) have all the air of being merely advertisements of BSR publications, please note that they are really inserted simply to let our Associates know part of what is going on at Hdqrs.
And if we are slow in answering even the most interesting letters, it's because we can't get anybody to arrange a 36-hour day for us.

Also, your Director has about a dozen book-length manuscripts on technical subjects - fascinating, but no desert island to retreat to for the reading of them. (Send them along but be patient).

Since Round Robin (and CQC and other publications) is a good deal like a 'house organ' and is addressed primarily to Associates, I take this occasion to remark to 'you-all' that while our office work and expenses have greatly increased, 'cash received' has not kept up with them --

And that if some publications (as by W.D.P.e.g.) can ask for and get donations of $500-$1000, there seems no reason why we should not ask our Associates to take a look at the check stubs and see if the balance will stand a small whittle or two. (We hate to mention this but our creditors feel no reluctance at all) --

We have been advised repeatedly toraise the price of membership - which includes Round Robin - but don't like to do this. Well, our mailing list is about 800 names (and we probably reach about 2500 by the pass-around circulation), and if even half of the 800 true and tried (badly tried?) friends would donate about 5 iron men (also known as moola) we would be quite happy for months to come - maybe could find more bad news for you, 'times bein' wat they be'.

Painfully

Meade L. ----

Furthermore and besides: If some of you get two of these pages (with RR and CQC), it's only that somebody's slip is showing (at Hdqrs.) ---
And additionally and naturally, some of our friends, having read this, will now please skip it - since they have already been extra-helpful.

THE YADA:
Sept.26,'53 ..... This brings us to the razor and the pyramid business. Any edge has its own magnetic field - any object has - a wire or tape recorder receives vibrations on its field. The field of the pyramid is not changed and there is no break-down in the field of the edge - hence no oxidation. . . You may get better results by putting blade with long side north and south.

The proportions of the Great Pyramid probably have some effect; it is built on the law of the triangle and in alignment with certain bodies in space. The blade is not sharpened; it simply does not become dull. What you have is a break-down of oxidation. Oxidation creates heat; it is not so much destroyed as simply retarded by the pyramid.

Slowing down oxidation in organic substances produces mummification instead of putrefaction.

(Question: what would happen to a man if he lived under a pyramid?) - Ha! he should be sure to fill his body with spices and wrap it in linens.

(Question). Yes, a pyramid would tend to dry up a wound. It would slow down oxidation and I have come to believe that everything falls apart through excessive oxidation. (Q). Yes, it would be worth while to experiment on a surface cancer. It would at least slow down the malignant action

(Q.). No, this does not oppose the Koch treatment. The poisons in the blood stream gives the catalyst something to work on besides the good cells.

Notes from a Santa Cruz physician. ....'I thought I would try without the pyramid, so on May 1st last I laid the safety razor on end on a glass shelf (with blade inserted, blade perpendicular, facing about 10 degrees east of north. Up to that time a blade usually lasted for two shaves at most. The one referred to remained good and sharp until about Oct. 5 (more than 20 weeks), when after using I inserted the blade in the opposite way to what it had been. It then began to dull. I turned it back the way I had it in the first place, and it is becoming sharp again. Meanwhile I have been using an <u>old</u> razor blade that I had discarded, but had put in a razor and set up in position about three months ago to see if it would regain its sharp edge. IT DID.

Now, I am wondering whether this phenomenon is due to any certain vibration on account of the blade being faced north, or is it due to some effect of 'mind over matter'. In the case of a friend who tried the same plan, no effects at all were noticed on the blades.

At our house we have a 3-mirror dressing table which shows a clear outline of 1½ to 2" all around a person - in daylight only. Moving it to different parts of the house makes no difference. A mirror maker said the effect had nothing to do with the mirror and that he had never seen it before. My wife's parents had a long hall mirror which, according to an elderly relative, "had the same peculiarity - we all stood around it admiring our halos." We think it may possibly be the physical aura."

In view of the Littlefield experiments and microphotographs, the Rhine experiments with the dice, and a book-full of scattered data in between, the effect of 'mind on matter', visibly and on our plane, is reckoned as definitely proven by investigators. Psychokinetic effects <u>may</u> have to be reckoned with, in the razor-blade phenomenon. --- If anybody else has an "aura-mirror", please tell BSR about it. ml

NOTICE: To Associates interested in basic concepts of electricity, magnetism, atomic structure, and gravity - as held by those on the 'other side' and expounded by The Yada di Shi'ite and Professor Alfred Luntz: We have a 15-page Transcript of a meeting devoted to these subjects, held on Sept. 26, 1953 - the group including four electronic engineers. Some comment was also made on the pyramid effects (dehydration etc.). Since a transcript of this length involves considerable time and expense, we shall have to make a charge of $1.00 for each copy.

Subscribers to the 'regular' Transcripts of the M.P. meetings will soon receive their Transcrip No. 25. The special Release described above is somewhat technical in nature and of limited interest, hence is offered separately. Single copies of T.25 (or others of that series) may be had @ .50 each.

In ordering the Transcript Release referred to in paragraph 1 above, please ask for T.R. 10-C-53.

MEMORANDA OF THE M.P. SEANCES. 13 of these have been issued as booklets (about 30 pages each), but for some months past we have been unable to supply certain issues. We now have a good supply of Nos. 11-12-13, and a few copies of Nos. 1-4-7. Price $1.50 each.

We can also supply EXCERPTS from the M.P. SEANCES, 1950 Series, Nos. 1 & 2. These are a continuation of the "Memoranda" just referred to, but in better and more attractive format. $1.50 each.

NEW PUBLICATIONS INCLUDE: - BIOGENESIS, by Assoc. Mark L. Gallert, (abstract and synopsis of Dr. Littlefield's work); 12 pgs., $1.00 -- WILL CANCER & POLIO YIELD TO RADIONICS, by Dr. Norman K. Edgars of Whittier, Calif., $1.00 -- THE ETHER OF SPACE, compiled by Meade Layne and including two articles by Raymond Natalli (Control) -- THE Q-ENERGY FILM (printed); reported by BSR Assoc. Ruth Reed and Originality House (Akron, Ohio) - with small sample of the film. $1.00 .

Also the long-delayed reprint of the BSR booklet THE KOCH TREATMENT - @ $1.00.

All issues of CQC - Nos. 1 - 9 inclusive, (@ .50)

THE AURAMETER BOOK: Development, use and effects of a most remarkable instrument, invented by Verne L. Cameron, of Elsinore, Calif. Compiled and edited by Meade Layne. (Mimeo, with line drawings, about 80 pgs., attractively bound). The material in this book is new, even in the field of radiesthesia; the instrument actually detects and delineates etheric objects, thought-forms, and the human aura. It detects the presence of underground water, the rays given off by cones and pyramids, and is being used in non-medical treatment and diagnosis by naturopaths, chiropractors and others. The Aurameter is, in brief, a highly improved form of the Pendule (though not a pendulum in form), and anyone who can use a pendule or a dowsing rod in any of their numerous forms, should soon get remarkable results with the Aurameter also. The instrument itself is hand-made and sold by Assoc. Cameron (it can be ordered thru BSR Hdqrs., @ $15.00): The Aurameter book can be had from us, at $3.00

WANTED: FOUR OR FIVE COPIES OF ROUND ROBIN IX-2 (for credit or exchange).
SPECIAL OFFER: THE KOCH TREATMENT (booklet)(regular price $1.00) and the new brochure by Dr. N.K. Edgars, on CANCER, POLIO, & RADIONICS ($1.00): BOTH FOR $1.75. Mark L. Gallert's BIO-GENESIS may be substituted for Dr. Edgar's booklet. ALL 3 FOR $2.50.

MEMORANDA TO ACCOMPANY BROCHURE ENTITLED
"FOR PUBLIC INFORMATION & THE SAKE OF THE RECORD"
****

(Issued by the Associates of the Borderland Sciences
San Diego, California, October 1953)

Now that a more understanding attitude is developing, in official quarters, concerning the matter of the "Flying Discs" or "Saucers", it seems advisable to add a few lines to our Public Information brochure.

We respectfully assure those in authority that our only desire is to contribute to the public welfare and to cooperate with all intelligent efforts toward that end.

We have data derived from some seven years of study of this problem of the aeroforms which we believe to be valid and important, even though much of it seems fantastic and is admittedly unprovable in the common acceptation of that word.

This interpretation is not an invention of our own, though we have to some extent collated and organized it. Our hope is, however, that it will be considered solely on its own merits and not be discredited a" priori. The fact that this interpretation is new to the Western mind should not result in its immediate rejection.

The Flying Discs and other craft are in part (not all of them) what would be called in philosophic terms EMERGENTS. In a series of concentric spheres, every point on one sphere (on its out-side) has a corresponding point on its in-side, and also on the outside and inside of all the 'nested' spheres. Anything existing on any sphere can "emerge" onto any other. That is, any object can emerge from one time-space frame into another - and neither time nor space is involved in this transition.

This is the only concept (historically known) which will account for the phenomena of the Discs and related craft. They do not have to contend with space-time factors, or with problems of fuel and of materials which will resist conditions of space flight.

The all-important matter, however, is: What does the visitation of these craft portend? It portends violent seismic disturbances, due to chemical changes in earth strata, the crystallization of the earth crust and its collapse into huge caverns. The source of this is increased solar radiation, cosmic ray radiation, and the expansion of the Sun into the condition of a Super-Nova. The process has long been going on but is now accelerated. Our visitors from "outer space" are here largely for purposes of observation and scientific record of these changing conditions.

Respectfully

Meade Layne, Director, B.S.R.A.

BORDERLAND SCIENCES RESEARCH ASSOCIATES -
Hdqrs., 3524 Adams Ave., San Diego 16.

Attention of all Associates:

With regard to the controversial subject of the Aeroforms (Discs, "Saucers" and other craft), the trend of events is now in every way favorable to the position maintained by us for some seven years past. The Sources from which our account of these phenomena was derived, remain constant to their first explanation, and there are no data to invalidate it.

The mere fact that such an explanation could be given, and was given by the Sources referred to, may sometime be recognized as a cultural event of supreme importance. And it is of very great importance that the essentials of the explanation be understood, since the incursion of the Space People (or Guardians) may remake, or signalize the remaking of human life on our planet.

If you wish to help in making our data accessible, you can do so by sending us names of persons to whom information should be sent. We will attend to the distribution - or you can send out a few pages of material yourself. So far as possible, it may be best to select publicists (writers, commentators, radio broadcasters), and men in public life who seem to be of receptive mind. Be sure to send us the address wherever this is possible.

There is much talk about a (supposed) forthcoming announcement by the Government, or perhaps by the Air Force, concerning the nature of the 'Visitation' - and perhaps having serious social and political bearings. We hope for a truthful and informed announcement - but take take this opportunity to issue a wanring against too much credulity and a too hasty acceptance of the whole of such a report.

It is highly improbable - if not impossible - that the Government or any Department of it should have all of the basic facts - and that if it did have them, that they would release them to the public. It is is to be expected that a limited amount of correct information will be given out, along with guess-work, errors, and many reservations. We should not be deceived, even in the interests of "public policy"- as the latter words have up to this time been interpreted.

This memorandum has two objectives: The warning just given - and the request for your help (para. 3 above). We want publicity for the information we have - and for the good of mankind. We are not trying to sell anything, or to gain prestige. From all appearances a very serious situation is developing - and YOU can help.

October, 1953

Nunc Di vortant bene quod agas -

Meade Layne, M.A., Director...

Two issues, $1.00. Contains only short articles and miscellaneous material, supplementary to the BSR bi-monthly ROUND ROBIN.

FLYING 'THING' BAFFLES S.F. YOUTH -

"The New Mexican", Santa Fe, New Mex.,
- November 3, 1953 -

Sixteen-year-old Jimmie Milligan - and a lot of other people - were completely baffled today by the bizarre appearance of what the Santa Fe youth described as the "thing", a metallic-looking object that floated in front of his car headlights as he was driving home from a dance on October 25. At first Jimmie said he thought it was a piece of metal blown across the road by the wind, but when he stopped to investigate he found what looked like a big, boat-shaped object - about ten feet long - lying in the weeds.

"Naturally I was a little bit scared and hesitant about getting too near to it. But when I reached out my hand to touch it, it raised up straight in the air for a couple of feet and then took off in a steep climb toward Santa Fe."

Doubts the 'Thing' from White Sands.

White Sands, New Mexico. - Brig. Gen. G. G. Eddy, Commanding Officer of White Sands Proving Ground, told "The New Mexican" today that "I doubt very much" that the object sighted by Jimmie Milligan in Santa Fe October 25 came from the Proving Ground.

"I don't know anything about the incident," he said. Pressed as to whether objects of the approximate size and description were being flown from White Sands, the General said that "we have many projects of a highly classified nature here, and I am not at liberty to talk about them."

White Sands Proving Ground is the hub of the armed forces' guided missiles program.

--- Jimmie got in his car and drove home in a hurry. "You should have seen him when he came in that door," his mother recalled. "He was white and shaky, and he looked so odd. 'I want to tell you something,' he said. 'You and Daddy'll think I'm crazy. But it happened. I'll swear it did. On a whole stack of Bibles.'"

Jimmie told them about the 'thing' he had just seen. His father, Harold F. Milligan, repair foreman for the telephone company, went back with the boy to the little dirt side-road to look for traces. "We couldn't see much because there was only the light of the moon to go by. We didn't have a spotlight on the car." They went back to their house, puzzled by the whole thing. Jimmie didn't want to report the incident to anybody. "They'll just think I'm crazy."

But word of what Jimmie saw got around slowly. "The New Mexican" heard of it last night and reporters drove out to the Milligan's new house off Bishop's Lodge Road, just past the baseball field. Jimmie reconstructed the whole thing:

"I was driving home from a YPF (Young People's Fellowship) dance at Palen Hall that night. It was Sunday, a week ago, and I guess it was around 9:30 in the evening. Well, I was driving on Bishop's Lodge Road, going north, and I had just reached the road that leads over to the ball park when it happened. I saw this thing come sailing in front of my headlights. It came from the right side, or from the East. It was so close tha t I thought my left headlight was going to hit it. I slammed on my brakes and turned off the highway to the left, toward where I saw it go.

"At first I thought it was just a piece of metal blown across the highway by the wind. But I realized later that there wasn't any kind of a wind that night. Anyway, I got out and went up close to where it was. It was setting in the brush at the side of the road, pointed toward town, and right in front of it was a dirt embankment and a wooden fence. I just had the light of the moon to go by, but here's the way it

looked to me. It was a kind of gunmetal color, sort of like a dull aluminum , and it was shaped a little bit like a great big bullet. I would say it was about three feet high, and ten feet long, and about five feet across. Its kind of hard to describe the shape, but it was something like a boat hull -- or like two boat hulls stuck together."

Jimmie said he was reluctant to get too near to it, but his curiosity made him reach out to touch it. As he started to do so, "the thing" began roaring and raised up in the air a couple of feet and then began climbing swiftly, just clearing the wooden fence.

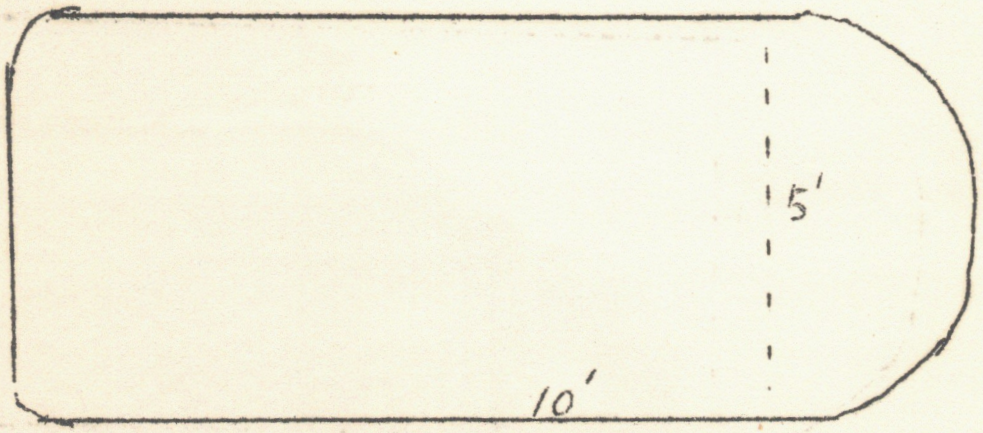
"There wasn't any glow or spitting of fire. I couldn't feel any suction and there wasn't any heat or smell of carbon monoxide in the air. When it was taking off, all I can remember is that it made a sound like a washing-machine engine -- but even faster, if you know what I mean. You know how a model airplane engine sounds? Well, it was sort of like that, only not so high-pitched."

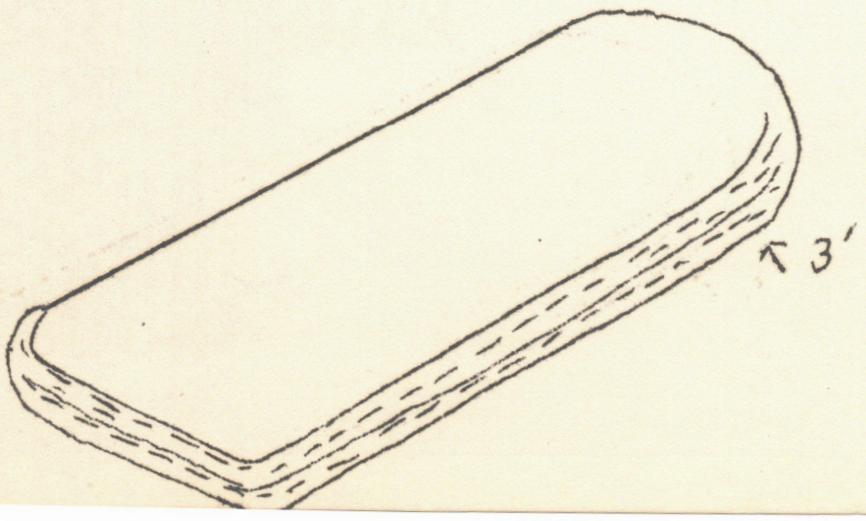
Jimmie, who is a junior at Santa Fe High School, has no particular reason to have aircraft or rocket-ships on his mind. He has never been especially interested in them, although he likes to build model racing cars, and spends most of his spare time "tinkering around" with his own car, an old Ford roadster.

His mother, a teacher at Harrington Junior High School, says Jimmie has never been the overly-imaginative type of boy. "You know what I mean," she said. "He wasn't always making up tall stories, or anything like that." She said that he was a good student, getting a B average in his studies.

After he saw the 'thing', Jimmie didn't want to tell anyone about it because, he said, "they would just think I was crazy." "You know", he said, "I kind of wish that I HAD hit the thing when it came in front of my car. Then I'd have some proof, all right."

- Clip from Associate W.I.R. -





CORRESPONDENCE:

Assoc. H.D.C. (Box 102, Yucca Valley, Calif., to BSR Director: 10-27-53):

.... Concerning the "Fohat Constant" (RR ix-3): Some of us who are dowsers and prospectors with various devices have readily found that a sizable chunk of high-grade ore which attracts certain types of indicator, will leave a hangover of that attraction on the spot which persists for some hours after the speciman has been removed. This residual force or whatever it is, will gradually weaken and disappear.

About the propulsion of the 'saucer' or 'scow' as told by the Natalli Control - the magnetic scientist, Mr. DeLand who passed away last year had told me it would be easily possible to fly a craft to Venus and back in a short time if we could utilize the magnetic lines of force for propulsion and repulsion - I believe 1250 lines per square centimeter.

I have made some pyramids, will experiment. I hear from one of our Associates, Ray E. of Minneapolis - who says he has had 33 shaves from a blade not under a pyramid or removed from the razor, by concentrating thought that it would stay sharp.

Every issue of RR is the most interesting yet.

Assoc. (Mrs) W.A.C., Rt. 3, Box 286, Coyote Pass, Hemet, Calif., to Director); 11-22-53

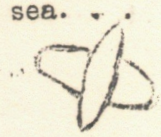
.....On the night of last August 25 or 26 ('53) I went to bed very early. It was a moonless night and very hot. A brilliant light woke me by shining on the and across my face. I jumped up immediately and looked out of the window. The whole half acre around the house was brilliantly lit us. I scrambled into a dressing gown and rushed out the front door onto the small terrace. The huge Disc was then immediately opposite me and seemingly slowing down - but when I made a movement to go down the one terrace step the Disc put on speed and went over the hills toward Winchester. The matters I noticed most clearly were the curious light, which did not seem to show up anything except our own place and did not have any special place of origin; then the ring surrounding the Disc, its stationaryposition, and its crumpled-up, silver-paper looking surface. . . I have told few people about this, knowing the ignorance and bigotry that exist . . . Will you let me know more of your activities?

Letter from England: Harold T. Wilkins,(29 Bean Rd.,Bexleyheath, Kent, Eng.) to RR.

..... Week of August 24, 1953, a flight Lieut. of the RAF was worried by great swarms of wasps at 4000 - 6000 ft., which seriously interfered with vision through the windscreen. Wasps do not normally fly at such altitudes. It has been noted in the past that swarms of insects synchronize with appearances of comets or cosmic phenomena. What is the causal link between these phenomena - if any? ...

On August 21, 1953, 29 youths rushed out of a hostel on Cleeve Hill of the Cotswold, Glostershire, in torrents of rain, to find a shed on fire and 29 cycles destroyed. At the same time, farmers at a place called Winchcombe, 6 miles away on Cotswold Hills, were worried by mysterious fires causing thousands of pounds damage. They mounted firewatch but police were baffled. On July 21, 1953 - a singular periodicity of exactly one month - a parson, a policeman, and a night postoffice truck driver on the Cotswold Hills, independently saw a thing like a white-hot poker in the sky dropping balls of lights. Time, 2:25 a.m. The parson also sees a singular luminous glow on the ground near some lonely woods. On August 1, 1953, 12 firemen and police (reported) they were mystified by something like a night plane crashed or landed. No aircraft reported missing. These phenomena differ but have one point

one point in common: mysterious apparitions in the sky. In 655 A.D. and several times in the 11th century, several monastic chroniclers report blazing fires in the sky - in one case over a ship in the English channel, when terrified people dived overboard and were drowned, and when a mysterious thing descended into the sea. . . One type of these mysterious aeroforms, twice photographed in the U.S. I suspect of being definitely hostile. I wonder where in h.... it comes from. In any case, it is not new, but has been seen at least 20 times over the Atlantic, over Great Britain, and over the USA in the 19th century, long before the time of airplanes.



Also, mysterious fires synchronizing with reported saucer visits have been reported from the US in 1947, and this year also.

I am much interested in reading Mr. Vaughn Greene on eerie places in California. This State, to judge from my correspondence, has a lot of fey people - some of whom may have been out a long time in the sun. But this has no reference to Mr. Greene. He notes the eeerie silence, reported to accompany mysterious tectonic disturbances, in woods and ranges in N.W. British Columbia, where trappers thought the world was tumbling about their ears. Yet afterward they could find no signs of any avalanch or fallen roack. It is also heard in South America: sounds as of rods violently clashed, or like cannot fire in the forests, sometimes in regions of supposed "lost cities". It scares the Brazilian Indians stiff.

In some respects this Clear Lake region reminds one of areas shunned by the Red Indians in the 19th century, which their tribal lore asserts are the homes of their dead. Mr. Greene's story suggests that the eerie region may have connections with some more settled regions. . .

- end -

ATOM BOMBS AND TORNADOS: "MR" Magazine, dated Jan. 1954, issued Oct. '53 (Vol.5, No.1) contains an excellent article by Thomas Polhemus, entitled "Do Atom Bombs Cause Tornados?" This must be read to be appreciated. "The situation resembles the flying saucer mystery" - with scientists and 'experts' at first pooh-poohing the idea, then retreating into an 'uneasy silence' - as the affirmative data are assembled. This eminds us, that in December 1949 the BSR published a mimeo booklet called "Previsional Atomic Research", by Assoc. Edw. S. Schultz, the concluding section of which deals with this same topic, though under the more general heading of "Weather Abnormalities". The author's opinions on this topic, along with half a dozen other 'forecasts' in the same booklet, are being verified. We have a few copies left: $1.00.

Q ENERGY: Reported by BSR Assoc. Ruth Reed. A printed descriptive folder, with small sample of the film. A remarkable product, safe, inexpensive, usable by anyone, result of ten years of research. We have the folder @ $1.00: the film itself can be purchased from ORIGINALITY HOUSE, INC., 480 Avalon Ave., Akron 20, Ohio.

WILL CANCER & POLIO YIELD TO ELECTRONICS? by Dr. Norman K. Edgars. A 10-page mimeo brochure of highly important material, which includes a last-minute announcment that "the radionic rate for poliomyelitis is 300-B. Dr. Edgars is Director and Chief of Staff at the Whittier Diagnostic Offices, 916 W. Broadway, Whittier, Calif. The brochure may be had from BSR Hdqrs. @ $1.00. We invite the attention of all doctors using electronics.

BASIC CONCEPTS in magnetism, electricity, gravity - as given by the Y.di S.Control, deep trance mediumship of Mark P., to a group of electronic engineers. Mimeo., not bound, 15 pgs. Please note the nature of this before ordering; it is somewhat technical and not designed for general reading. A few copies @ $1.00.

FIRST EXPERIMENTS WITH CAMERON AURAMETER. Assoc. Gilbert Ryan, to V.L. Cameron: You will remember having mailed me an Aurameter instrument. The very first pass I made at a person it hit the aura at 8" from the waist line and refused to move further in. Within 30" of opening the package the 'thing' located one playing card from nine spread out on a table and covered with a towel. My son and his family selected the card. I let him try it and with fresh cards he did it also, twice at first trial. He never saw the aurameter book, never heard of it, and did not think it would work. We placed objects on the table, then removed them. By cooperative form building each of us was able to find the spot where they had been. You are welcome to show this to any 'doubting Tom'- or send him to see me personally.

(Lee Haven Trailer Court, 628 Coast Highway, Newport Beach Calif.

An 80-pg mimeo. book on the Aurameter is obtainable from BSR Hdqrs., and the instrument itself from Rev. V.L. Cameron, Box 1120, Elsinore, Calif., @ $15.00 (Book, $3.00)

E. Block Comments:

..... Mr. Cameron is all right, but opinions of others in your Round Robin would greatly strengthen belief in pyramids, aurameters and pendulums. These things are but crutches and some people do not need them. The ZNO does not work for me - so, I have grave doubts about the Aurameter. But the pendulum works fine. What is your proof. Can you recommend their purchase only because they work for Wallace and Cameron. We cannot say, 'buy one of these things and it will work....'.

(The BSR Director is always glad to get careful detailed reports on either successful operation or failure of experiments - and can never guarantee that any device or experiment will work for any particular person. Too many variables and too many unknown factors/. As to the Aurameter, it is my understanding that if the purchaser fails to get results after a reasonable time (and following instructions) Mr. Cameron will make an adjustment on the amount paid.

Mr. Block (whose address is Indianola. Ill.) is himself a person of unusual gifts, including the ability to dehydrate or 'mummify' food-stuffs by using his hands only. And of course there are people who can perform dowsing operations (for water, oil, other substances) in a similar way -i.e., without using any 'rod' or instrument. Radiesthesia in all its forms is as much a mental or psychic operation as it is 'physical', and any attempt at explanation which depends on drawing a line between these two aspects will always remain partial and inadequate... Associate Block is much interested in the growing of food stuffs, agriculture, soils, as well as in little-known rays and emanations connected with them. He is glad to reply to correspondents. (ml)

STILL SHAVING with the same blade (says Assoc. Al Ramirez) two months old. Blade still like new. Will try food stuffs soon" (PO Box 301, Silverdale, Wn.).

(Two persons have reported "no results" with this razor blade business; six or seven are surprised and enthusiastic, figure that one pack of blades for the rest of their lives will be s'nuff. -- We want reports on effect on seeds, micro-organisms, saprophytes, infections - the basic principle being retarded oxidation and a 'mirror-effect' of the triangles - of which more later.

ASSOC. NELL BONTON sees 1, 2: "Well, at last I saw what I think was a flying saucer. It was four o'clock in the morning and this object was moving toward me, and visible only a few seconds. But don't let anyone tell you that the people who report these things are having spots before their eyes (ask Gen. Spaatz about this)

m.l.

This was a very brilliant light and it blinked as tho' it was expanding and con - tracting, without going out. There was abright clear light in the center rimmed by a red light around the edge. These things just can't be described unless you see them. But this is what I think is important: there have been two seen in the day-time over the same place, about 16 miles west of Lompases, Tex. My brother in law, who was born and raised near this place, told me that the exact spot where the saucers had been seen was different in some way - and that lightning was always striking there... Geologists have investigated that part of the State for years as there are peculiar rock formations, also evidence that prehistoric animals have lived there...

(1647 Highland Blvd. San Antonio, Tex.

(The Mark P. Controls have recently explained - AGAIN - that many landings in isolated places, and such acts as dipping up water (as at Brush Creek) or taking soil or rock, are for sampling purposes - the space people are studying the internal and surface conditions of the planet, which are undergoing rapid and somewhat ominous changes... We thank Assoc.Nell Bonton for the 'lead'. Repeated landings or close sightings at the same place should be carefully noted - and reported).

Probably the best help in thinking the operations of the aeroforms is the illustration given by the Yada; the importance of this is such that we shall probably repeat it many times: There is no flight across space in the sense of traversing interstellar distances in any kind of 'material' craft (as we understand the word material). Consider a 'nest' of concentric balls, one within another. Any point on either surface of any ball will have corresponding points on the surfaces of all the other balls. Any object or condition can emerge from its surface onto the surface of any other ball. These surfaces correspond to space-time frames of reference. In this illustration, assume there is no space between the concentric balls. If no space, no time is required for "crossing" it. The transition is effected by converting the energy rates (changing the vibration) of the etheric substance involved. Whenever these energy rates fall within the range of our senses, we are able to see, hear, and touch the etheric object - which then becomes matter as we commonly think of it. Etheric matter by reason of its density is susceptible of control by mental energy (thought). The withdrawal, gradual or sudden of an aeroform (from sight), is often (not always) due to a reconversion of energy - a kind of "dematerialization". These basic concepts probably apply to the entire range of aeroform phenomena.

Assoc. Faith Gleason (Belfast, N.Y.) to BSR Director:

"Last RR was 'super' - they all are. . . Regarding the pyramids, several days ago I made one from cardboard, 4 x 3 3/4". I cut each side separately, taped them together, then set it on another larger piece of cardboard with one side to the north. Under it I put a half-open red rose, and several little button mums also dark red. I have just looked at them. This is the 5th day and both the rose and the mums are as fresh as when picked. In a month I'll send a further report.
F.G.

This is the first experiment reported to us where flowers were used. Some one should try a fairly large pyramid (4-sided) over a bouquet. Florists using this idea will please send Faith Gleason (or BSR) a few iron men (or, seriously, a report on the results, if any).

CONCERNING THE ATTACK ON THE ELECTRONIC MEDICAL FOUNDATION -

Attention of all BSR Associates

The following material is self-explanatory. This attack on the EMF, ostensibly by the Pure Food and Drug Administration but certainly inspired by organized medicine, is exactly on a par with the vicious assault by the same agencies, on Dr. Koch and the Koch treatment in years past - an attack which completely failed to prove its allegations. The Electronic Medical Digest, published by the EMF, is in our opinion the most advanced and liberal-minded in its field, and (incidentally) constantly publishes scientific material which coincides closely with our BSR activities. If you can bring this latest outrage to the attention of persons of means, intelligence, and good will, you will be performing a service to humanity.

M.L.

LETTER: Fred J. Hart, President E.M.F., to the BSR Director: Oct. 27, 1953.

..... Attached to this letter you will find a news item and a letter we are sending out to all our users in an endeavor to raise $20,000 to fight this case in behalf of the sick people of America. It is a pitiful thing when organized medicine uses the government to pull its chestnuts out of the fire. We who are engaged in Borderland research have enough problems without these added burdens. Unless all who are interested in a fair deal (will help) we are not going to be able to raise the funds to handle the litigation. I am appealing to you, if in keeping with your policies, to give us an editorial in your next Round Robin. This $20,000 looks like a large sum, but we will need to present approximately 100 capable witnesses, besides meeting court costs and attorney fees. We got very wonderful results from your write-up some time ago regarding our Autumn 1950 issue.

signed

CIRCULAR LETTER: ELECTRONIC MEDICAL FOUNDATION - 2452 Van Ness Ave., San Francisco 9, Calif. Oct 15, 1953. (Excerpts).

.... 'The EMF is a non-profit organization and is so recognized by the Treasury Dept. for income tax purposes. Any gift made to it may be charged against income. The EM Foundation has repeatedly advised the Food & Drug Administration that it stood ready to correct any portion of its literature which might give a wrong impression, and has kept the Division supplied with its publications ... All monies donated will be kept in a separate fund - and will be returned if the case does not go totrial (for lack of defense funds.) If the costs are less then predicted, the balance of funds received will be prorated. NO DONATION CAN BE TOO SMALL OR TOO LARGE.

- - - - - - - - - - - - - - - - - - -

The San Francisco Examiner of Oct. 3, 1953, published an item entitled: "U.S. SUIT RAPS 'CURE' DEVICES" referring to this proposed attack on the E.M. Foundation. A mimeo. copy of this accompanies the above letter, and the last lines read: "R.C. Nelson, Asst. US Attorney said, that if the Government gets the injunction, a general drive may be started against distributors of quack devices." Pres. Fred Hart truthfully comments: "Any device not approved by organized medicine is labeled as quack."

Your BSR Director is personally of the opinion that the A.M.A. is probably the most greedy, heartless, hypocritical and generally vicious organization of our time, and carries the responsibility for an immense amount of unnecessary suffering and painful deaths. Ask your doctor if he belongs to the AMA - and if he admits it, ask him WHY - and insist on an honest answer. ML

(The 'circular letter' and the Examiner item referred to above, may be had from the Electronic Medical Foundation, on request, 2542 Van Ness Ave., San Francisco, Calif.)

PARTIAL REFERENCE LIST OF PUBLICATIONS AND GROUPS DEALING WITH AEROFORMS
- AS OF NOVEMBER, 1953 -

ORGANIZATIONS and their officers doing excellent work in the flying saucer study are as follows: Joseph Barbieri, Research Director, Saucer Phenomena and Celestial Enquiry (SPACE), 19 East Avenue, West Haven 16, Conn.; N. Meade Layne, Director, Borderland Sciences Research Associates (BSRA), 3524 Adams Ave., San Diego 16, California; Richard Hughes, Secretary, Flying Saucer Club, 42 Rothbury Road, Hove 3, Sussex, England; Harold H. Fulton, President, Civilian Saucer Investigation (New Zealand), P.O. Box 1914, Auckland, New Zealand; and L. T. Whitney, Honorary Secty., Australian Flying Saucer Investigation Committee, Box 5278, G.P.O. Melbourne, Australia.

(List quoted from SAUCERS, I-2).

NUMEROUS BOOKS have been published over the past few years about flying saucers. These include: "The Flying Saucers Are Real", by Donald Keyhoe; "Behind The Flying Saucers", by Frank Scully; "The Coming Of The Saucers", by Kenneth Arnold and Ray Palmer; "Agharta", by Robt. Ernst Dickhoff; "Flying Saucers", by Donald H. Menzel; "The Ether Ship Mystery And Its Solution", by N. Meade Layne, M.A., "Is Another World Watching?", by Gerald Heard; "The Mystery Of Other Worlds Revealed", edited by Lloyd Mallan; "Flying Saucers", by O. L. Jaggers; "I Rode A Flying Saucer", by Geo. W. VanTassel; "Flying Saucers Have Landed", by Desmond Leslie and George Adamski; and "Saucers From Outer Space", by Donald Keyhoe.

-- NEW BOOKS AND OTHER SOURCES OF INTERPLANETARY INFORMATION ---

"The Saucers Speak", by G. H. Williamson & Alfred C. Bailey. A documentary report of Interstellar Communication by Radiotelegraphy. This report is documented with affidavits and is Mr. Williamson's experiments and research carried on in Arizona with Radiotelegraphic contact with the "discs". The book is being published by the New Age Publishing Co., 1542 Glendale Blvd., Los Angeles 26, California.

The International Flying Saucer Bureau
"Space Review", a monthly publication
